Supply Chain Practitioner (FMCG) Level 3

Supply Chain is at the heart of every business – it is a system of organisations, people, activities, information and resources involved in moving products or services from supplier to customer. It may include the transformation of natural resources, raw materials and components into a finished product.

Effective and dynamic supply chains are particularly important in fast moving consumer goods (FMCG) sectors, for example food & drink, retail or consumables, where products have one or more of the following characteristics: high volume, fast turnover and frequently purchased. FMCG have a short shelf life, either as a result of high consumer demand or because the product deteriorates rapidly. In contrast, durable goods or major appliances such as kitchen appliances are generally replaced over a period of several years. Supply chain functions include procurement, forecasting, planning manufacture, customer service and logistics.

They have a comprehensive understanding of the entire supply chain, are responsible for their impact on each function and strive to deliver the best value for their business and customer. Due to the high number of interactions both within and outside of the business, they need strong relationship building, influencing, stakeholder management and communication skills alongside sound analytical, information technology and numeracy skills, with an ability to work in a fast paced environment with frequently changing requirements.

Duration: Typical duration 30 months for new entrants.

Entry requirements: Employers will set their own criteria, but typically an entrant to this apprenticeship will already have achieved a minimum of Level 2 in English and maths. Apprentices without level 2 English and maths will need to achieve this level prior to taking the end-point assessment for this apprenticeship.

Knowledge

FMCG Supply Chain Practitioners have the Knowledge of:

- ✓ **Critical supply chain key performance indicators**
- ✓ **Key legislation, policies and procedures that influence the supply chain**
- ✓ **The characteristics and specific needs of different customer groups**
- ✓ **Information technology (IT) systems for the supply chain**
- ✓ **The key principles of Continuous Improvement (CI) Management and Problem Solving**
- ✓ **The importance of new products and how a product is costed**
- ✓ **The principles of capacity planning**
- ✓ **Procurement**
- ✓ **Forecasting**
- ✓ **Plan manufacture**
- ✓ **Logistics**

Skills

FMCG Supply Chain Practitioners have the following Skills:

- ✔ **Prioritise the flow of FMCG products or services**
- ✔ **Lead and participate in everyday problem solving**
- ✔ **Use continuous improvement techniques to improve performance**
- ✔ **Lead the creation/development of Standard Operating Procedures**
- ✔ **Manipulate and interpret constantly changing data sets**
- ✔ **Analyse large amounts of data to identify key trends**
- ✔ **Use IT systems for the supply chain**
- ✔ **Complete supply chain documentation**
- ✔ **Develop and manage a small project plan**
- ✔ **Identify, manage and escalate risks to the business**
- ✔ **Communicate using appropriate methods and FMCG terminology**

Behaviours

FMCG Supply Chain Practitioners demonstrate the following Behaviours:

- ✔ Ensures safety of self and others

- ✔ Have courage/conviction in their decisions
- ✔ Acts in alignment with the business vision and values
- ✔ Builds good relationships with others
- ✔ Tenacious approach to problem-solving
- ✔ Highly effective communicator at all levels

End Point Assessment

End point assessment (EPA) is an assessment of the knowledge, skills and behaviours that your apprentice has learned throughout an apprenticeship, which confirms that they are occupationally competent.

Assessments have been designed by employers in the sector and are conducted by independent bodies known as end point assessment organisations (EPAOs).

The apprentice will only get their apprenticeship certificate after they have passed all the elements of their EPA, including any required standards in English and maths.

What does assessment involve?

Each apprenticeship includes an end point assessment plan, which describes how the apprentice should be tested against appropriate criteria, using suitable methods. For example, your apprentice may need to complete:

- a practical assessment
- an interview
- a project
- written and/or multiple-choice tests
- a presentation
- professional discussion

We will inform you at the beginning of the apprenticeship what the assessments are involved. This will give your apprentice plenty of time to prepare. For example, they may need to gather evidence to show how they've been working towards the core knowledge, skills and behaviours required.

Additional description of FMCG Supply Chain Practitioner's Knowledge:

End-to-end characteristics and processes of the FMCG supply chain in different contexts

Critical supply chain key performance indicators: inventory, forecast accuracy, plan attainment, customer service, vehicle utilisation, on shelf availability and waste, quality and value in line with business requirements and expectations, commerciality; and their impact on other parts of the business

Key legislation, policies and procedures that influence the supply chain: health and safety, environmental, sustainability and others relevant to the business context such as large goods vehicle (LGV) driver hours and food safety/safe manufacturing practices

The characteristics and specific needs of different customer groups: retailers, business-to-business, ecommerce and export

Information technology (IT) systems for the supply chain: Excel, material requirements planning (MRP) systems and business planning systems

The key principles of Continuous Improvement (CI) Management and Problem Solving

The importance of new products and how a product is costed

The principles of capacity planning

Procurement: the principles of buying – strategic and operational decision making (influences, risk, cost); and legal and customer requirements (anti-bribery policies, ethical approaches and frameworks)

Forecasting: the levers and influences on customer and consumer demand (market trends, weather, competitor activity and seasonality); the impact of merchandising on supply chain decisions; and others relevant to the business context

Plan manufacture: the principles of developing and implementing a supply plan taking account of capacity, product life and the key drivers of success

Customer service: the principles of order capture and management, from order receipt to delivery through to customers, the importance of customer fulfilment

Logistics: the importance of logistics cost, the impact of short-lead time and high demand volatility logistics on network planning

Additional description of FMCG Supply Chain Practitioner's Skills:

Prioritise the flow of FMCG products or services based on evolving and changing information; meeting critical deadlines to ensure the efficient running of the FMCG supply chain, including managing unexpected demand

Lead and participate in everyday problem solving activities required for the FMCG industry where small process improvements can have a significant improvement on the rest of the supply chain, using recognised techniques: 5 Whys and fishbone analysis

Use continuous improvement techniques to improve performance in the FMCG supply chain, such as forecast accuracy

Lead the creation/development of Standard Operating Procedures to ensure improvements are documented and shared around the business

Manipulate and interpret constantly changing data sets to inform decision making in the supply chain function(s)

Analyse large amounts of data to identify key trends and themes that affect the FMCG supply chain; make recommendations to internal and external customers, the world of increasing data availability sources may include customer electronic point of sale (EPOS) data, historic forecast vs. dispatch data, historic customer shipping/delivery data

Use IT systems for the supply chain; Excel and company and customer systems

Complete supply chain documentation for audit requirements

Develop and manage a small project plan within a supply chain function(s) to improve operational performance

Identify, manage and escalate risks to the business, such as customers significantly exceeding their forecast, factory breakdowns, supplier failures, delivery failures and customer relationship issues through to not fulfilling an order in full, to ensure that products produced and delivered against very short lead times are available whenever and wherever consumers choose to purchase, at the lowest possible cost

Communicate using appropriate methods and FMCG terminology; verbal, email, face to face

Additional description of FMCG Supply Chain Practitioner's Behaviours:

Safe working: ensures safety of self and others, challenges safety issues

Responsiveness to change: demonstrates and encourages curiosity to foster new ways of thinking and working to ensure economic benefits are maximised

Pride in work: aims for excellence, time management, adherence to deadlines

Have courage/conviction in their decisions and demonstrates ownership of work

Acts in alignment with the business vision and values, desire to learn about the FMCG industry, acts as an ambassador

Builds good relationships with others, works collaboratively, contributes ideas and challenges appropriately, leads by example

Tenacious approach to problem-solving by working to identify and ensure root causes are resolved to ensure supply chains remain flexible and agile

Highly effective communicator at all levels and with a variety of stakeholders: always acting with integrity and respect
